The Comprehensive Transportation Plan (CTP) is a multi-modal strategy that identifies transportation system improvements necessary to meet future mobility demands within the CRTPO’s jurisdiction. The CTP creates a unified and effective three county system that addresses diverse multi-modal needs that includes highway, public transportation and rail, bicycle and pedestrian elements.

The Comprehensive Transportation Plan (CTP) is important...

• To help plan the region’s transportation future
• To develop a coordinated, multi-modal plan to address the region’s transportation needs
• To ensure the CTP reflects the diversity of the region
